

# HiQu Digital Bath

Aqualisa HiQu digital bath filler  
(Processor, controller and remote)

HQ1005 – For high water pressure  
HQ1006 – Incorporates a pump for low water pressure

210mm

One touch start/stop button

Thermostatic temperature control

Depth setting

## HiQu Digital Bath

Shallow fill, half fill and full fill selectors are etched onto the HiQu control. A simple start/stop button is all it takes to get your bath running and it stops once it has reached your chosen depth – so you can simply fill... and forget.

An additional feature is the 'top up' option, which allows you to select a low flow top up at the push of a button if your bath is cooling down, or too hot. The latest overflow bath filler delivers your water in a stunning fan tail pattern.

## HiQu Digital Bath controls

HiQu Bath features a depth function, which once set, allows you to fill a bath to your chosen depth and preferred temperature with just one touch of a button. As a safety feature, HiQu Bath has a 12 minute maximum run time, to prevent overflow.

Temperature increasing

Temperature decreasing

Programming mode (bath only)

White light flashes while filling to pre-set depth (bath only)

Desired temperature and flow have been reached

# Planning your HiQu Digital Bathroom

## HiQu Digital Bath

HiQu Digital Bath brings sophistication to bathing, with its simple to use controls and three programmable depth pre-sets, plus an optional remote control which allows you to fill your bath from up to 10 metres away.

Controlled by a compact, remotely sited digital processor, HiQu Bath uses an overflow filler rather than bulky taps and comes with a top up feature to reheat a cooling bath.

For added luxury you can team your digital bath fill with a sleek retractable hand shower.

## HiQu Digital processor box options

Driven by Aqualisa's award winning digital technology, HiQu is controlled by a compact processor box which can be located 10 metres from the bathing area in the loft, airing cupboard or under the bath. It controls flow and blends hot and cold water with thermostatic precision, delivering perfect baths and showers every time. Remotely siting the processor box makes access and installation easy, eliminating the need for extensive excavation of the bathroom wall and damage to décor.

HiQu Digital processors are backed up by Aqualisa's 5 year manufacturer's guarantee.

## Working with your water system

The correct processor solution for you will depend on the type of water system in your home. Choose from a HP/Combi compatible processor or Gravity compatible processor (with integral pump).

HiQu Bath with overflow filler and remote control

## HP/Combi – Digital processor

## Gravity – Digital processor with integral pump
